REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The present invention pertains to methods of maintaining configuration in a configurable device (such as field programmable gate arrays) and to methods of correcting errors in configuration data. The claimed invention (claim 23 as the broader independent claim) recites features such as:

“(a) performing a first readback of a portion of the configuration data and generating a first checksum value indicative thereof;

(b) performing a second readback of the same portion of the configuration data and generating a second checksum value indicative thereof; and

(c) comparing the first checksum value with the second checksum value and, if they are not identical, indicating that remedial action should be taken.”

The prior arts teach (U.S. Patent No. 6,104,211 Alfke is an example of such prior arts), configuration data is read from each of three different devices and then compared against each other. Therefore, the prior art detects errors by using three similarly configured devices and regularly comparing data in each of the devices to detect an error. The present application verifies configuration data by reading portions of the configuration data twice and comparing the checksum from each read of the configuration data.

As such, it is not clear that one of ordinary skill in the art at the time of the invention would have made the necessary modifications to the prior art of record to encompass the limitations set forth in the present application. Moreover, none of the

prior arts of record, taken either alone or in combination, anticipate nor render obvious the claimed inventions. Hence, claims 23-35 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cynthia Britt whose telephone number is 571-272-3815. The examiner can normally be reached on Monday - Thursday.
